

UNIVERSITY OF TIRANA

Unpatchable: Living with a Vulnerable Implanted Device

PhD Student

PRESENTED BY:

ROMINA MUKA

LECTURER / PHD STUDENT, UT, TIRANA

PHD STUDENT, NTNU, NORWAY

ABOUT ME

Romina MUKA

Lecturer / PhD Student

Engaged in continuous study and learning..

Work as a lecturer near University of Tirana, Albania (subjects: Information Security, Cryptology, Management Information Systems, Introduction to Informatics); PhD student near UT, Albania in collaboration with NTNU, Norway); training, mentoring and awareness & more...

Past life (pre-.com) was spent in Statistics, Open Source Software, Mobile App Developer, CRM System Analyst, Web Designing

PHD TOPIC

e-Health Systems: secure information transmission and storage

*Unpatchable: Living with a Vulnerable Implanted
Device*

Sometimes, hackers make the worst patients...

Lorenzo Franceschi-Bicchierai, Vice Motherboard

With connectivity comes vulnerability....

PACEMAKER EVOLUTION

TRUSTING MACHINES

IOT

**The Internet of Medical "Things" is real,
and people's heart are wired into it...**

REMOTE MONITORING

POTENTIAL THREATS

- Device is vulnerable?
- Access point is vulnerable?
- Mobile network is compromised?
- Server at vendor is compromised?
- Web site that doctor logs in to is vulnerable?

POTENTIAL IMPACT

- Patient privacy issues
- Battery exhaustion
- Device malfunction
- Death threats and extortion
- Remote assassination scenario...

**“We need to be able to verify the software
that controls our lives”**

Bruce Schneier on “Volkswagen and Cheating Software”

PACEMAKERS ARE VULNERABLE

Fig. 2. Equipment used in our experiments. At top is a 4 GSa/s oscilloscope. At bottom, from left to right, are: our eavesdropping antenna, an ICD, our transmitting antenna (mounted on cardboard), and a USRP with a BasicTX card attached.

Source: Daniel Halperin, Thomas S. Heydt-Benjamin, Benjamin Ransford, Shane S. Clark, Benessa Defend, Will Morgan, Kevin Fu, Tadayoshi Kohno, and William H. Maisel. Pacemakers and implantable cardiac defibrillators: Software radio attacks and zero-power defenses. In *Proceedings of the 29th Annual IEEE Symposium on Security and Privacy*, May 2008.

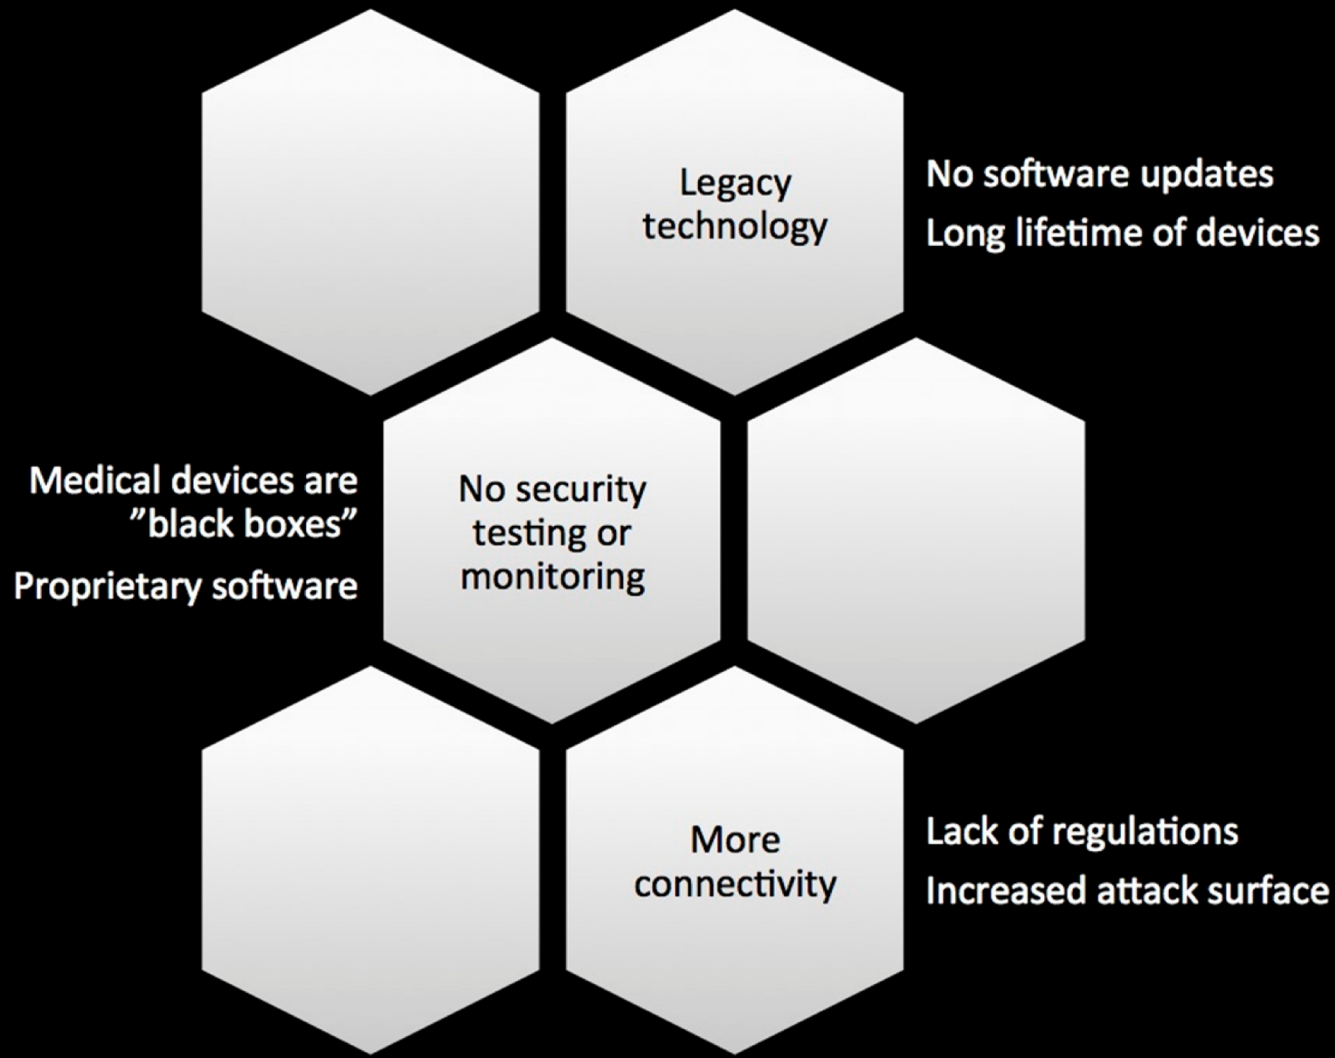

Barnaby Jack Could Hack Your Pacemaker and Make Your Heart Explode

June 25, 2013

by William Alexander

Why?

How to solve it?

Hack to save lives!

Regulation
Procurement
Safety by design
Security testing

Vendor awareness

Security research

Information sharing
Third party collaboration
Coordinated disclosure

Security risk monitoring

Security updates
Incident response
Cyber insurance
Resilience

“There will be bugs”

**THE BENEFIT
OUTWEIGHS THE RISKS**
